Installation Portfolio

Windows, doors and specialty
openings

Draft 01 · October 2026

SELECTED RESIDENTIAL & TRADE WORK

RESIDENTIAL • BUILDER • TRADE PARTNER

Installation work that holds up at every scale.

A selected record of completed window and door installations across detached homes, character properties, additions and small commercial buildings. The focus is consistent: prepared openings, clean alignment, coordinated finishing and a result that belongs to the architecture.

- Whole-home window replacement
- Bay, bow and specialty windows
- Patio doors and wide openings
- Interior and exterior finishing
- Renovation and builder coordination
- Product-specific installation support

01 · WHOLE-HOME REPLACEMENT

One house. One coordinated result.

A coordinated package across every elevation, with consistent profiles, alignment and finishing.

02 · CHARACTER HOME

New performance, with the original rhythm intact.

Tall units, projecting windows and upper-storey access delivered as one coordinated scope.

03 · CONTEMPORARY UPDATE

A consistent black-frame package, inside and out.

Dark frames across standard, tall and projecting units create one clear architectural language.

04 • BAY & BOW WINDOWS

Projection, structure and finish - resolved as one detail.

Projecting windows demand careful handling of support, roofing interfaces, exterior cladding and the interior seat. The selected work shows both finished results and the access required to achieve them.

INSTALLATION

FINISHED

From direct replacement to a completely new opening.

Sliding, hinged and multi-panel systems are installed with attention to opening preparation, threshold conditions, weather sealing and final interior/exterior finish.

BEFORE

AFTER

OPENING PREPARED

FINISHED

06 • LARGE OPENINGS & SUNROOMS

More glass, aligned across the full wall.

Large assemblies bring more coordination: structure, unit-to-unit alignment, perimeter sealing and finishing all have to land cleanly.

07 · SPECIALTY & HERITAGE

Custom-looking results without losing the house.

Dormers, divided-light patterns, arched compositions and irregular cladding conditions require a measured installation approach and disciplined exterior detailing.

Divided-light patterns · custom exterior conditions · careful sightline control

HOW WE WORK

A clear sequence from site review to final clean-up.

01 Review

Confirm product, opening, access and finishing requirements.

02 Prepare

Protect the work area and prepare the opening for installation.

03 Install

Set, align, fasten, insulate and seal to the agreed scope.

04 Finish

Complete trims, inspect operation and leave the site clean.

SCOPE FIRST

Site conditions vary. Access, protection, removals, disposal, finishing and product responsibility are confirmed before installation.

BUILDERS · DEVELOPERS · MANUFACTURERS

A field partner built around the project scope.

For trade partners, the value is predictable execution: clear scope review, practical site communication, coordinated access and a documented finished result.

- Single openings through multi-unit packages
- Renovation, addition and small commercial work
- Coordination with supplied products and site schedules
- Progress photography available when required

LET'S REVIEW THE NEXT PROJECT

Residential care. Trade-ready execution.

Share drawings, photos, quantities and timing. We can review the openings, access conditions and finishing scope before installation begins.
